Re: City Park Redevelopment Authority Partnership Support

Commissioner Ellis,

I support City Park Redevelopment Authority's Partnership Program application for design and construction funds to improve the E. TC Jester and Bevis intersection, installing a pedestrian hybrid beacon and connection to the White Oak Bayou Greenway. These intersection improvements are critical for enhancing safety and connectivity for the pedestrians, cyclists, and vehicles that regularly visit the Timbergrove Sports Association complex and use the White Oak Bayou Greenway.

The E. TC Jester and Bevis intersection is a top community concern, frequently discussed at community meetings and public engagement for its multiple safety issues. The TIRZ12 Mobility Plan identified this intersection as the top ranked intersection for safety improvements, based on a needs-based analysis. The planned improvements will address the identified safety deficiencies at the intersection.

Thank you for considering the E. TC Jester and Bevis Intersection project and its impact to the children, families, and residents within our area.

COUNCIL MEMBER SALLIE ALCORN, AT-LARGE 5
