Note: All materials in exterior walls, including windows, siding, framing lumber, and interior shiplap (if originally present) must be retained except where removal or replacement has been explicitly approved per this Certificate. Shiplap is an integral structural component of the exterior wall assembly in balloon framed structures and removal can cause torquing, twisting and collapse of exterior walls. Shiplap may be carefully shored and removed in small portions to insulate, run wire or plumbing, and should be replaced when the work is complete. Maintenance and minor in-kind repairs of exterior materials may be undertaken without HAHC approval, but if extensive damage of any exterior wall element is encountered during construction, contact staff before removing or replacing the materials. A revised COA may be required.
